

Net Medical Telemed Building Blocks

Net Medical Introduces Telemed Building Blocks Build Your Own Branded Solution

Instead of purchasing an application for your telemedicine deployment that just doesn't fit your needs, take a look at our new customizable building block tools.

Net Medical has the programming staff to customize telemedicine.

Our *Office of Program Management* helps you think through the way you'd like to handle telemedicine - whatever you're working on quickly and easily through our *Telemed Building Block* technology. We'll even provide the interconnectivity to your existing web based medical programs.

- Video Conferencing
- Digital Documents
- Secure Text Messaging
- Customised Apps
- Hosted Apps
- Access to 435 Specialists in 50 states

Video Conferencing

WebRTC Conference Switch is *Net Medical's* technology perfect for video conferencing between remote providers and patients. Nothing to download since it's already built into Google Chrome and Firefox browsers. Connect to the Internet and you'll have conferencing capabilities for more than 10 simultaneous participants.

Digital Documents

Digital Paper turns forms, business logic, and paper into custom applications that you design. Add our sophisticated database package, secure text messaging, and IT management tools and we'll deliver building blocks to do telemedicine the way you'd like to have it work. *Digital Paper* fully integrates into *WebRTC* to deliver a "Single Pane of Glass" for your providers to work, all within one Chrome browser screen.

Customised & Hosted Apps

Net Medical's Office of Program Management helps you think through the way you'd like to handle telemedicine through our *Telemed Building Block* technology, with interconnectivity to your existing web based medical programs. Since *Telemed* is a hosted solution, we'll deploy your application on any modern browser.

Once developed, we'll even assist with our network of over 435 specialists licensed in all 50 states, putting the finishing touches on your requirements for a cost efficient program for today's *Telemed* services.

Contact *Net Medical's* program management team. We'll demonstrate how easy it'll be to use *Net Medical* technology for telemedicine. And the best part.....it'll be deployable in weeks not months.
